Local Newslets

Mr. Lorne Proudfoot, M. L. A., left Saturday night for Edmonton, where he is attending the U. F. A. convention held at that city.

Mr. Ole Blagen, of the Kimmund district, who has been ill in the Cereal hospital for the past few weeks, is recovering.

Mr. and Mrs. L. Leftwich visited at the home of Mr and Mrs. W. Anderson on Sunday.

A pleasant evening was spent by those who attended the card party and dance at Cloverleaf last Friday evening. The ladies first prize was won by Mrs. W. Anderson, gent J. Robinson, consolation ladies Mrs. Leftwich and Geo. Thompson.

The Collholme U. F. A. held their monthly meeting at Peyton school on Saturday afternoon. The resolutions now before the Annual Convention at Edmonton were discussed and some of them brought forth much comment on the C. C. F. The ladies served lunch.

Mrs. Ted Lensgraf, of San Juan, Texas, is in Cereal taking care of her father, Mr. Fred Nichols, who has been ill for some time.

Mr and Mrs. E. B. Allen and family were guests at the home of Mr and Mrs. Geo. Trogan on Sunday the occasion being Rays birthday.

Cloverleaf school district held their annual meeting last Wednesday, Mr. A. Carlson was elected trustee in Mr. Ferguson's place, who resigned.

The Myrtle school district held their annual school meeting last Saturday.

The Allen twins Richard and Thomas celebrated their second birthday on Sunday.

The Advance

Journal of an Optimist

By H. L. GEE

Don't I despair

If things are not going well with you, don't despair, my friend

If business is going down steadily; if your income is decreasing; if you are out of work; if every time you apply for a job you are disappointed; if you have work you loathe; don't despair.

If you keep trying to do some thing, and never manage it, don't despair; if you make good resolutions & then break them; if you try to control your temper and cannot; if you try to be gentle; but hardly know how; if you want to be good and fail oh, my dear man or woman, don't despair.

If you are ill and see no hope of recovery; if you have to watch loved ones suffer; if your only son is going the pace and you cannot stop him; if you are tied to a worthless husband & he will not die; if all you hoped for has been torn from you; if to-morrow casts a dark shadow over you; God be with you, whoever you are and wherever you are, and God help you not to despair.

For listen! There is only one thing that is absolutely final for bad, and that is complete despair. As long as you can hope faintly against hope; as long as you can keep on trying bravely; as long as you have grace and courage and strength sufficient for all the terrible bitterness and suffering of the day; so long may things improve; so long may something unexpected happen.

And you, broken though you are, remember you are not alone in your wretchedness. Remember there is yet something you can do. Remember that immense trouble requires immense faith and courage. Be brave, and if I can share a bit of your sorrow, tell me about it, that at least you shall not be in the dark alone

Craigmyle Grain Elevator Razed By Fire Friday

CRAIGMYLE, Jan. 12 (Special)—Fire destroyed the United Grain Growers' elevator at Craigmyle late Friday night. The alarm rang shortly before the arrival of the midnight express from Calgary. The flames even then leaping high and the elevator beyond all hope of saving. The freight platform and shed opposite were set on fire, but fine work by the citizens saved the railway building.

Within an hour after the alarm was given the huge elevator trembled, wavered and crashed, a total wreck. The company's coal shed was a source of danger to the pool elevator. The coal shed fell to the north and thus saved the pool property which would certainly have gone if the coal shed had fallen east. The origin of the fire is unknown.

School Fair Concert

Remember the School Fair benefit concert in Chinook, Jan. 26th. Adults 25 cents. Children free. Come along for a good cause. Ladies please bring lunch. A Dance will follow.

SPEAKERS FAVOR HOME TRAINING FOR YOUTHS

"No nation ever rose higher than the level of its home life, and if things are not right in the nation, then in the last analysis the fault may be found in the home," declared Rev. J. E. Todd, in the course of an address at Grace Presbyterian church Thursday evening, which was led by Ven. Archdeacon C. Swanson. The service was one of four held Thursday as part of the annual prayer week of Protestant churches of the city.

"I am perfectly sure," he said, "that the family is the basis of the whole civilized life of our land, yet thousands of men are asking themselves if the family as an institution is being found wanting. We are called upon to ask ourselves if it is functioning as healthily as might be. I honestly think that the fault is our family life, today lives in the lives of men and women who are older, and ought to know better, rather than with its younger members.

"We do not have to look far for the solution of life's ills. Many parents, like others, have been doing the unwise thing. They have been trying to run their lives and their homes without God. Everything minus God always spells tragedy.

At a meeting led by Rev. James Dorrin in North Hill church, Rev. R. H. Williams, pointing out that while there was often a shortage of houses there was always as far greater shortage of homes. The family circle, he said, was a great field for Christian work, declaring the duties of the domestic altar to be as dear to the heart of God, as the preaching of the Gospel.

Rev. W. H. Morgan, speaking in Hillhurst United church, where Rev. Robert Macgowan was the chairman, declared there was a pressing need for clear thinking in the world today. "Our problems will only be solved individually, not nationally," he asserted and we won't have economic recovery until man's outlook on life is changed, until selfishness is eradicated.

Under the chairmanship of Rev. J. Rex Brown, Rev. T. T. Faichney addressed the service in St. Andrew's Presbyterian church, speaking on the subject of "Two way prayer." The amazing promise made by Jesus; ask, and ye shall receive, seek and ye shall find, knock, and it shall be opened unto you," leaves no place for final despair in any life or situation," he said. "The radiant quality of life which He lived. Kingdom of God, quality, was itself the demonstration of the true truth of His word," the speaker concluded.

HORSES DIE FROM EXPOSURE AT EXCEL

EXCEL, Jan. 16 (Special)—Mild weather has prevailed for past weeks. Farmers, taking advantage of this break in the cold to look up horses that are running at large, find that many have died from poor feed and the severity of the weather.

ALBERTA WOMEN HONORED

Two Alberta women were among those honored by King George on New Year's Day, with membership in the Order of the British Empire. These were Miss A. Tilley, for many years head of the nursing mission in Lethbridge, and Miss E. Pearson, Superintendent of the Municipal Hospital at Grande Prairie.

Mature Age and Efficiency

An Eastern professor recently informed a gathering of Eastern educationists that no person over 40 years of age should be permitted to teach school. This recalls that other dictum of that famous doctor who said that every person over 65 should be quietly chloroformed. Both statements fail to convince because they are so palpably overstatements.

It is true, of course, that youth is becoming more insistent for recognition in the world of affairs, mainly because the problems of the times appear to call for that courage, initiative and energy which are compact of youth. The war robbed one generation of its birthright and opportunities. The depression appears to this generation to have repeated the process. That youth should be insurgent against conditions which they did nothing to bring about, is natural in the circumstances, and possibly salutary in the result. The Communist movement in Russia was energized by the youth of Russia; Mussolini recruited his Fascist army from the ranks of youth. Hitler has enrolled German youth under the Nazi banner. These are manifestations of youth's protest against forces inimical, they believe, to youth's fulfilment.

The trouble is to set a hard and fast line, where youth ends and age begins. If that were possible, it would be possible more accurately to estimate the significance of the two statements and their many imputations and implications. But there is no such line. It is possible to cite instances innumerable of men beyond forty who have proved great teachers of the young, and men who have made their finest contributions to civilization after passing sixty-five. Had Arnold of Eton been forced to retire at 40, British education would have been that much poorer. Had Edison civilized his faculties exhausted at that age, much of his work for the advancement of science and enhancement of living, would have been left undone. Had forty seen the vitality of Einstein's mental powers reach its zenith, there would not have been that competition among the great institutions of learning for his services which followed his expulsion from Germany. It was after he had passed the age of forty, that Henry Ford had his great idea and launched the enterprises coupled with his name. The tally of similar examples can be carried ad infinitum.

In the political field, President Roosevelt, far beyond the "assigned" "deadline" of forty, has tackled the vast problems of his country with a courage, vigor and zest which qualify him for a place with youth in these characteristics. Ramsay MacDonald, with equal energy and resource, did not hesitate, when the needs of his country called for drastic action, to scrap the ideals of a lifetime for ideas of more practical efficacy in the crisis of the hour. The youth of Russia, Germany and Italy accepted leadership of men beyond the "allotted span," because these men oriented the chaos of ideas torturing the youthful minds. Youth, apparently, construed in terms of abstract qualities, cannot be measured by age—which suggests the well-known saying, "A man is as old as he feels."

There must be some reason for a prominent educationist to make so startling a statement to a gathering of educationists however. It is impossible to believe that, with such an audience, he spoke in jest, in an idle moment or without proper forethought. Perhaps his inspiration may be found in the work of the Spanish philosopher, Ortega y Gasset, who, in "The Modern Theme," has suggested that each generation is distinct in itself in that it differs in its reactions to ideas and environment from the generations preceding it. If this thesis be admitted, it would follow, of course, that one generation's viewpoint, being radically different from that of the one succeeding it, the former is out of touch with the youth of its own day and therefore not qualified to be its mentor. The more remote the generation from that of school age, the more out of touch it would be with the student's ideas and ideals.

Whatever the difference, custom has decreed that the one should be vested with the tutelage of the other. It is difficult to see how it could be otherwise. While there may be something in the contention that the generation from which the teacher be drawn should not be too remote from that furnishing the school population of today, it must not be forgotten that the knowledge gleaned from experience of life and living acquired by the older generation must be of inestimable value in preparing the young for their responsibilities.

After all, no new social structure is created with each new generation. They may improve, or remodel,—and the social structure characteristic of western civilization is the cumulative result of such improvements. Something constant is imparted from generation to generation however. So long as this condition exists, the accumulated experience of the past must retain its value and, finding expression through the process of education, in school or in the home, be passed on to those preparing themselves for the duties and responsibilities of full citizenship.

Youth demands recognition and should be recognized. But an intelligent definition of youth, other than that of mere time, is necessary to complete acceptance of the statement that no person over forty should be entrusted with the task of teaching youth.

Science gradually is extending the period described by life insurance companies as "life expectancy." Why bother, if chloroform is the best potion when one has reached sixty-five?

Rule For Egg Shipments

No Canadian eggs are allowed to be exported out of Canada unless they are packed in Canadian Standard cases—each case contains 30 dozen eggs—in new dry export fillers and flats, and with new kiln dried, paper-covered, excelsior pads at top and bottom, or with any other pad, flat, or cushion approved by the Dominion Minister of Agriculture.

A wheel in the great clock of the former royal palace at Potsdam, Germany, revolves only once in a period of 400 years. There's a clock to hold a clock-watcher.

Shortness of Breath Weak, Sinking Feelings

It going up stairs, climbing hills, walking too far; if it least action causes you to strain to get your breath, or if you have weak, sinking feelings, it is time for you to stop and think as to the cause of your trouble.

What you should do is take a course of Milburn's H. & N. Pills. They tone up and strengthen the vital organs so as to prevent any harmful attacks of disease.

Ask your druggist for Milburn's H. & N. Pills.

Hold Strange Congress

Romanians Of World Plan Establishment Of Stable Community

"Gipsies of the world unite!" is the motto of the General Association of Romanians which held a strange congress in Bucharest.

The wave of fanatic nationalism which is sweeping these parts of Europe has also affected the nomads who want to give up their free and easy life and organize themselves into a race-conscious and stable community. Thus the last etidol of romanticism and liberalism in its absolute sense is about to be ruined. It will be replaced, in all probability by political demagoguery.

Hundreds of Romanians in picturesque dresses came to the congress, flocking in from all corners of the country. The meeting took place in the open air, in the idyllic quarter of Bucharest which consists of innumerable mud huts built around a pestilential lake on the outskirts of the city. A regiment of gendarmes took care that the participants behaved themselves.

The congress was held in perfect order. The gipsies seemed convinced that they were entering upon a new era of "national dignity," as was announced by their leader, George A. Lazurica, an exceptionally good impersonator of Hitler both as regards aspect and oratory. Following are some of his most galvanizing phrases: "We are a great and noble race. We don't want to be ridiculed and treated as the dregs of society. Let us form a strong nucleus in Roumania, and all the Romanians of the world will be inspired by us and become proud of their race."

Unusual Staff Employed

Work In Restaurant Done By Ex-Convicts

London has a restaurant which is partly staffed by ex-convicts and men and boys who are on probation, the promoter being Arnold Hall, connected with the Howard League for Penal Reform and very much interested in the work of assisting "old lags" to reform. The results of this unusual venture are said to be satisfactory. Arnold Hall began in 1928 in a cellar, with a convict who had been 33 years in prison, a large piece of cloth and himself. They did upholstery work until they had accumulated some money and the present restaurant grew from this small beginning.

"The thing works very harmoniously and the men are extremely happy," Mr. Hall said. He explained that the restaurant at which from 80 to 90 lunches are served every day is not only giving the men their industrial opportunity, but it is providing an acid test as to their intentions to go straight.

The men started with a wage of five shillings a week and their lunches for a fortnight. After that they were given 25 shillings a week and later, if they are doing well, they receive 35 shillings a week. Eventually they are made waiters and receive 18 shillings a week, their lunches, insurance and about 25 shillings in tips.

There are men working in the restaurant who have been in prison for more than 30 years. Boys are sent to him instead of to Borstal, the magistrate paying their wages.

Curassow In St. Louis Zoo

Hen Foster Mother Cannot Understand Strange Bird

Among strange friends can be added the attachment at the zoo, in St. Louis, of a baby crested curassow and an ordinary domestic hen. The reason is strange, too, but understandable. Knowing that a curassow, a black bird glossed with purple, does not usually care for its eggs, zoo officials put several under a domestic hen. Much to their surprise, one of the eggs hatched.

The antics of the youngster have almost driven the hen frantic, but it is a common sight at the zoo to see the little bird, which will some day attain the size of a small turkey, ride about on the back of its foster-mother.

Surefooted Was Right

The townsman had been particularly interested in the skilful driving of an old farm-hand.

"That's a sure-footed horse you have there," he remarked, as the horse and cart went by. "Aye, mister, it be," was the reply. "It's kicked me three times, and allus in the same place."

Fifty years after Jesse Boot started his first store in Nottingham, England, his widow, Lady Trent, has just opened the 3,000th branch.

The "Bury Netherlands" campaign is reported to be helping Dutch industries.

WORKED ONLY ONE WEEK IN TWO

Sciatica Kept Him At Home

It is the wife who sends us this interesting story about her husband's troubles. She writes: "For some time past, my husband has been able to work only one week in two, on account of sciatica. He suffered so much from it that he could scarcely move for the pain. We tried many things, but without result. Then we saw in the papers an account of the good results that had been obtained from Kruschen Salts, and we decided to give them a trial. For twelve months past, my husband has been taking his 'little dose' of Kruschen every morning. Now, he has no more trouble with the sciatica, and is working regularly." (Mrs. M.)

Doctors estimate that one-half of sciatic humanity suffers from partial constipation. This condition results in an unsuspected residue of waste matter, which poisons the blood and produces sciatica, as well as many of the mysterious aches and pains from which people suffer. Kruschen keeps the organs of elimination in perfect trim, so that every particle of poisonous waste material is expelled gently, regularly and completely.

Just British Justice

Full Judgment Given Eamon De Valera In Will Case

Miss Mary Fitzpatrick, a resident of Brighton, in England, dying last year, bequeathed an estate of \$15,000 in England to Eamon de Valera, President of the Irish Free State.

John Fitzpatrick, of Dublin, a brother of Miss Fitzpatrick, contested the will, alleging that Miss Fitzpatrick was not of sound mind, and did not know or approve of the contents of the will.

Mr. de Valera took action in the English Probate Court to enforce the will.

Mr. Justice Baenson, sitting in London, gave full judgment for Mr. de Valera. He said he was satisfied Miss Fitzpatrick was of perfectly sound mind, and that John Fitzpatrick had completely failed to make out his case.

The London Times report of the suit, Dec. 14, is headed simply "Action by Mr. de Valera." There was no comment on the judgment in the Times or, so far as we have noticed, in any British paper.

Just a matter of course—British law, a British court, justice.

One can imagine a good many countries in which, under corresponding circumstances, a corresponding result could not be so easily predicted, or at best such a matter-of-fact affair about it. Just justice.—Ottawa Journal.

Expect Increase In

Live Cattle Shipments

Canadian Officials Anticipate Better Market In United Kingdom

Officials of the agricultural department look forward to a good year in the export trade of live cattle from Canada to the United Kingdom, despite the quota which will limit shipments for the first three months. The limit is slightly under 8,000 head, and to what was shipped last year during the same three months.

The United Kingdom had a shortage of root crops last season. The result was that many cattle raisers without sufficient fodder sold their cattle for slaughter when only partially finished. The shortage of feed in Canada also caused many unshipped cattle in this country to be shipped to Great Britain. The result had a depressing effect on the market which was injurious to both British and Canadian cattle raisers.

Basis Of Egg Weight

The attention of egg shippers and egg packers is called by the Dominion Department of Agriculture to the fact that in the revised standard egg grades, individual eggs serve as the basis of weight rather than dozen or case lots. In the instance of Grade "A" large, for example, each individual egg in the pack is required to weigh two ounces and over. Similarly in the medium pack each individual egg must weigh at the rate of 22 ounces and under 3/4 to the dozen.

New 55¢ Size LYDIA E. PINKHAM'S TABLETS FOR WOMEN

They relieve and prevent periodic pain and associated disorders. No narcotics. Not just a pain killer but a modern medicine which acts upon the CAUSE of your trouble. Persistent use brings permanent relief. Sold by all druggists.

Believes In Simple Life

Hitler Rises At Six And Puts In Busy Day

Hard work and utmost simplicity mark the daily life of Adolf Hitler, real dictator of Germany, now that the elections have returned him to uncontented power.

Hitler lives in a small apartment in the new annex of the reich chancellery, completed only two years ago. Only his faithful chauffeur, an old war comrade, with whom he has covered many thousands of miles all over Germany, and the latter's wife are sharing this apartment. She is, at the same time, his housekeeper and has even to do the chancellor's laundry.

Frau von Papen, the vice-chancellor's wife, who lives only a few houses away in the Wilhelmstrasse, casts an eye from time to time over the "bachelor-chancellor's" household. Since personal friendship now links Hitler with the aristocratic family of his former political rival.

Hitler is an early riser. Though his day often ends late at night, he is always up again at 6 a.m. The telephone are already ringing when he takes breakfast between 6:30 and 7:00.

The personal expenses of the chancellor are very modest. He turns his salary over to a special fund for needy families members of Stormers killed during the years of street fighting, or disabled Stormers. The large income Hitler may derive from his book and from his share in the "Voelkischer Beobachter," now Germany's largest paper, are mostly spent for the upkeep of the Nazi party machine.

Hitler never attends any social events, but whenever he finds time he likes to go to the theatre or opera. Wagner's works are his favorites. For other recreation he reads as much as he can in his scant spare time.

On the few week-ends which are not filled with official functions, such as the laying of cornerstones, unveiling of monuments, or the meeting of some important professional or party organization, he rusies by aeroplane to Bavaria, to spend a day or two at his cottage at Obersalzberg, near Berchtesgaden among his beloved Bavarian Alps.

Idea Is All Wrong

Scientists Maintain Rare Meat Less Nutritious Than Well Done

Modern Samsons who attribute their muscular superiority solely to the fact that they munch their daily ration of meat when it is raw, red and juicy, are all wrong, according to two British scientists.

These two scientists assert that contrary to popular belief, underdone meat is less nutritious than the more thoroughly cooked.

Other culinary customs, which have stood the test of a thousand years, are upset by the research workers, who declare that a hot oven is unnecessary for the initial stages of roasting, as the high temperature does not form a juice-retaining pellicle on the meat.

Barbecue fans will thrill to the knowledge that meat roasted in the open is more nutritious than in the oven. Roasting, grilling and frying are found to result in smaller losses of mineral salts than either steaming or boiling.

The two main losses result from cooking, shrinkage and loss of the valuable mineral salts on which nutrition depends. The investigators say that overcooked meat contains, pound for pound, more protein and more fat than underdone.

Chinese Cook Is Aviator

When Course Is Completed Will Return To China

Jong Wong, 31, Colorado's only Chinese aviation student, celebrated Chinese Independence Day with his first solo flight. Wong, a cook at Fitzsimmons General Hospital in Denver, says he will return to China on completion of his course.

General Forsythe picked Wong up while chasing Villa through Mexico, and obtained permission to bring him into the United States. Since that time, Wong, a native of Canton, has been attached to army posts at San Antonio and Denver.

Maple Products Unlimited

There are no special restrictions concerning the importation of maple products into Norway, but maple syrup and sugar are practically unknown in Norway and Sweden, although large quantities of sugars and syrups are consumed in these countries.

Time heals all wounds. But our time on earth is limited. That's the trouble.

..NIGHT COUGHS

Little Investors Save Billions

National Savings Movement In England Has Proved Success

British thrift is increasingly becoming a national virtue, as indicated by figures given by Walter Runciman, president of the London Board of Trade, in connection with the national savings movement.

"The total wealth of small investors in various types of investment at a conservative estimate," he said, "reaches the stupendous figure of £2,833,250,000 (approximately \$14,166,250,000). What with this national savings movement and all that pertains to it, there is very little doubt that we need have no fear as to a country being swept away on a wave of Bolshevism."

Lord Mottistone, chairman of the movement, stated that the increase in the amount standing to the credit of depositors in the post office and trustee savings banks and to investors in national savings certificates and in government stocks purchased through the savings banks during the last three years, in spite of the financial crisis, was more than 3 1/2 times the increase during the previous three years.

Reach Highest Level

British Columbia's Foreign Lumber Exports Greatly Increased Last Year

In spite of the general reduction in the volume of world trade, lumber exports from British Columbia to points outside of North America have reached the highest level in the history of the industry, exceeding the previous record established in 1929 by 110 million feet or 35 per cent, 200 million feet having gone from this province to Great Britain alone. Instead of one-fourth, British Columbia is now shipping almost three-fourths of its sawn lumber to overseas destinations and is the leading lumber exporting area of North America. Total shipments during the first nine months of 1933 approximated the total for the whole of 1932—Victoria, B.C., Times.

IT'S LIVER THAT MAKES YOU FEEL SO WRECHED

Wake up your Liver! No Calomel necessary

For you to feel healthy and happy, your liver must pour two quarts of liquid bile into your lower bowels every 24 hours. Without this bile, your digestion, blood elimination, poisons in the body, general weakness, etc., will be the result. You can expect to clear up a situation like this by using Carter's Little Liver Pills. You need Carter's Little Liver Pills. Purely vegetable. Safe. Quick and sure results. Ask for them by name. Refuse substitutes. 54

Just About Equal

The Rocky Mountains and the maritimes are just about equal in the mind of Airman Humphrey Madden. Forced to a low altitude by rain, sleet, strong headwinds and ice forming on the wings while flying from New Glasgow to Halifax, early in January, Pilot Madden said it was the toughest flight in his experience—nearly corresponding to a hazardous crossing of the Rocky Mountains he had once made.

Markets for Canadian wheat flour have been developed this year in France, Estonia, Brazil, Ecuador, British East Africa, Siam, Gibraltar and the Canary Islands.

SCOTT'S EMULSION OF COD LIVER OIL

13-33

SCOTT'S EMULSION RICH IN VITAMINS

OCCASIONAL WIFE

By EDNA ROBB WEBSTER

Author of "Joretta," "Lipstick Girl," Etc.

SYNOPSIS

Camilla Hoyt and Peter Anson, young and in love, marry secretly, deciding to live their own lives apart until Peter is able to provide for her. Peter is a young, struggling sculptor trying to win a competition for a scholarship abroad and Camilla is the adopted daughter of a wealthy family. She is not to inherit money when she comes of age and so is studying commercial art in the hope of landing an agency job. Others in the story are Avis Werth, another wealthy girl who is trying to win Peter; Sylvia Todd, Peter's model, and Gus Matson, his former roommate with whom he has quarrelled. At a party at an exclusive club Peter entertains Camilla's guests with impersonations. When the rest of the members of the party go to a cabaret to continue the gaiety, Peter and Camilla slip off to the beach by themselves and fall asleep on the sand. When they awake it is early morning and Avis and another boy are standing near them.

(No Go On With The Story)

CHAPTER XXVI

Avis' surprise and consternation over her discovery of Peter and Camilla on the beach in the early morning, were no less than Camilla's. The first light of dawn cast grotesque shadows on the four faces that stared at each other while their conglomeration of thoughts made hasty adjustments and conclusions.

"The pallor of fatigue and faded make-up gave to Avis the haggard appearance of a much older woman; while even in the dim light, Camilla's vivid beauty glowed like the promise of sunrise in the sky. She met Avis' accusing, triumphant, angry gaze with a half smile, as if the situation amused her.

All four of them appeared ridiculous enough, for there was no light more merciless to face than that of the early dawn and there is nothing that so leaves its stamp upon the features as the night abused by day. Avis' condemning hauteur increased. "So, this is where our hosts spent the night," her words blazed with scathing emphasis.

Camilla dismissed all effort at self-defense. "It beats spending the night where you were. Did you just get back? Peter and I were waiting for you, but we didn't think you would stay in town all night. We must have dropped asleep." She was scrambled to her feet and was shaking the sand from her chiffon evening dress.

"I should think you did. Waiting for us?" Avis sneered, and turned to Terry with a scornful imitation of laughter.

Terry shifted his weight from one foot to another, avoided Camilla's eyes and looked at Peter.

Peter's jaw was set hard, but the expression which lighted his eyes denied his serious concern. Fate had forced the issue, he was thinking.

No Cold Is a Fixture with Buckley's Mixture

No, sir, no matter how hard and deep-seated your cough or how bad, BUCKLEY'S MIXTURE will conquer it in half an hour. The very first dose gets down to business—you can feel it doing it.

Its lightning-fast action amazes everybody when they take it for the first time.

If you, or any member of your family, has a cough, cold, flu or bronchitis, try Buckley's and be convinced. Real substances. Buckley's is sold everywhere.

W. N. U. 2020

Perhaps it was best, after all. He looked at Camilla and smiled a little. They certainly did not act like guilty culprits, Avis was thinking with surprise. "I wouldn't say anything more now," he advised quietly. "Then we had better all go up to the house," she suggested, seeming not at all perturbed.

Avis looked at her queerly. She was willing to go the limit, fostered by modern social conventions, but Camilla's nonchalance in the face of such evidence as this, astonished her. The four turned and ploughed through the sand in silence, single-file in a desolate little procession. The waves lapped the shore softly, as if in gentle sympathy.

The girls mounted the steps that climbed up the side of the cliff house, Avis leading. The boys stopped below to light cigarettes.

"Well?" Terry inquired under his breath, holding his lighter for Peter. "Sorry we went to look for you, but the kids insisted. What are you going to do about it?"

Peter inhaled and exhaled the smoke slowly. "Whatever Camilla decides," he said, and started up the steps.

"Can't we fix it up?" suggested Terry. Queer how, in spite of the single standard of morals, men defend each other in such difficult crises, and women are eager to betray one another. Woman proclaims her equal freedom and independence from man, but still clings to the ancient characteristics of primal jealousy and feminine revenge that were fostered by her dependence upon man.

Peter muttered his appreciation. "Decent of you to suggest it, but I think Camilla will manage all right."

Some of the guests had retired to their rooms, but most of them were about to witness the triumphant entry of Avis and her captives. She said nothing, but her elaborate air of scorn and accusation conveyed exactly what her words might have.

"So you found them!" Cathie had exclaimed when they first appeared. "We really were anxious about you, Camilla. No one knew where you had gone for the night." Then Avis' congealed manner indicated the situation, she looked at Camilla queerly and added, "Well, now that we're all here, let's turn in. I'm dead!"

Avis turned confidently to Terry. "Will you drive me home, please? I've had enough of this."

"Before you go," Camilla's soft voice sounded strangely resonant in the stillness of the early morning, and every eye turned to look at her closely. She hesitated for a dramatic moment, "—allow me to present my husband. Peter and I have been married for more than a month and we expected to keep it a secret for awhile longer—" she stopped, with a little helpless gesture which explained everything. The silence grew more tense.

"Married!" Cathie was the first to exclaim, finally. "Why, you say old pirates, you!" She threw her arms around Camilla and kissed her. "First to kiss the bride! Say, let's raise the crowd out and celebrate the good news."

"Please don't," Camilla begged. "Let's get some rest and celebrate later. Remember, even mother and dad know nothing about it yet. Won't you let me explain everything to her first?"

Her suggestion was agreed upon, as if each of them enjoyed the idea of entering the conspiracy to keep the affair a secret for a few more hours. Only Avis did not relinquish her air of shocked disapproval, and insisted upon leaving for home with Terry.

"As you wish," Camilla said, with no effort to detain her. So it happened that it was Avis who made public announcement of Camilla's marriage to Peter. At a discreet hour of the morning, Mrs. Werth telephoned her social antagonist with a steamed leer of mischievous delight.

"I had never supposed," she told Mrs. Hoyt with distinct emphasis, "that when I permitted my daughter to attend your house party, I was exposing her to questionable influences."

"Why—" Mrs. Hoyt was agitated with horror and anger, "what do you mean?"

"Oh, you know about my daughter finding Camilla with that young rascal who has been seen with her. Of course, Camilla says they are married, but—"

That was the charge which disturbed Mrs. Hoyt from her lethargy of wonder and led to action. She terminated the conversation with Mrs. Werth as abruptly as the subject permitted, and hastened to Camilla's room.

Camilla had not slept since retiring, but she was resting until the

How To KEEP FIT

When your physical regularity is disturbed, and you feel run-down and "headache," the best way to take Andrew Liver Salt is to take several scoops daily until the normal state is re-established. Andrew's salt gives Nature the aid she needs to do this for you by stimulating the inner cleansing function. These normal habits are recommended, the Andrew's Rules of Health: Eat moderately. Get lots of sleep. Fresh air and exercise. And take a bracing, refreshing dose of Andrew's Liver Salt once or twice a week. Sustained good health will amply repay you. Get Andrew's from your druggist, in line at 50c and 100c—New, large bottles, 75c. Sole Agents: John A. Huston Co., Ltd., Toronto.

household stirred. She was too excited for sleep, anyway, and rather happy that events had reached this climax, when her position as Peter's wife would be determined before the world. Mrs. Hoyt's knock on her door did not surprise her, but the expression of horror and anger on her face did. She knew that Mrs. Hoyt had heard the news, already. Even when Camilla had been only a little girl and Mrs. Hoyt's built had towered above her in condemnation, she had not seemed so tall and so furious as she was now.

She closed the door and stood over Camilla where she had risen to a sitting posture on the bed. Her small, hard eyes blazed with anger and her words hissed from behind closed teeth.

"So! This is the way you show your appreciation for everything I've done for you!"

Camilla met her gaze bravely, but with due respect. "You mean about my marrying Peter," she said quietly. "I was just waiting to tell you as soon as I heard you awake."

"Then it is true—"

"Yes, I've told you?"

"Mrs. Werth—of all people. She began with some accusing remark about Avis finding you."

"Yes, I'm sorry about that. But rather glad in a way, because it's a relief to tell you—"

"A relief!" the voice lashed her as if the older woman wielded a whip. "Do you think it is a relief to me to learn not only that you have deceived me all summer with this—this unspeakable affair, but that you have made a mess—"

Camilla was tempted to smile a little at the implication. "That it does not seem that I have made a mess—"

The Story Of A Horse

Veteran Of War Now Pensioned By Her Owner

Twenty-two years old and a war-veteran, twice wounded and possessing a record of more than four years' service—that is Mary. And Mary, a round-bellied, dark bay mare, now lives in honored retirement, the pensioner of her owner, Colonel Lorne T. McLaughlin, C.M.G., D.S.O., V.D., on a farm just outside Bowmanville, Ontario.

Foaled in 1911, Mary was just four years old when she enlisted in the First Canadian Contingent—in the 2nd Battalion. From the start the stars shone on her, for she became the charger of the Commanding officer, the late Sir David Watson, K.C.B. Later she continued to perform that duty with Lieut.-Col. (now Brig.-General) A. E. Swift, C.M.G., D.S.O., but for a brief space in 1916 she was supplanted by a milder upstart from the western plains, named Minnie, who was the favored one of Lieut.-Col. W. M. Yates.

Mary's glories were almost completely eclipsed when the late Brig.-General R. P. Clark, C.M.G., D.S.O., brought a chestnut hunter to the battle as his first mount, on his becoming commanding officer. But with his departure, Mary again came into her own, and for nearly two years, reigned supreme among the equine members of the unit, as Colonel McLaughlin's first horse.

Unusually intelligent, gentle, courageous and fleet, Mary was by all accounts the favorite steed in the transport lines. She was twice wounded, but always carried on. And now, in the twilight of her existence, far removed from the gunfire which held her for no terrors and from the aery music of the brass band which the greatly loved and behind which no horse stopped with better gait or arid high its head with greater pride—From The Legionary.

French Plane Spans Ocean

Completes Crossing From Africa To South American Port

The great French flying boat, "Southern Cross," reached Nant January 4, completing an Atlantic crossing from Saint Louis, Senegal.

The plane landed at 7:10 o'clock for the flying time of 18 hours, 17 minutes for the 1,970 miles. The distance from Saint Louis to Natal is 1,970 miles.

The four-motored hydroplane is the French entry in a race with Germany to set the first trans-Atlantic air mail line between Europe and South America via Africa.

It is capable of carrying 11 tons of fuel.

Within two months the French government hopes to initiate daily service between Paris and Rio de Janeiro—with a non-stop hop schedule over the south Atlantic.

The giant plane with a wing spread of 144 feet, landed easily on the Pottery River. The flyers said they averaged 110 miles an hour.

Had To Be Transferred

Old Phonograph Discs Would Not Work On New Machines

The British Museum has phonograph master discs on which, in the old days of horn recording, were registered the voices of famous men now dead. Some time ago a number of people gathered to hear Lord Tennyson speak from a disc made many years ago. Only a jumble of sound results, and it was found the disc would not be played on a phonograph in use at the time it was made, but no such instrument is in existence. Engineers finally solved the problem. Putting the disc on a modern phonograph they played the old cylinder and converted the harsh and unintelligible sounds into minute electric waves, which were then passed through tone filters and transferred to a new master disc.

The Rule To Follow

In some reports of the jubilee celebration of Chief of the Maclean clan the name was spelled "MacLean" and in others "Maclean." In reality, the Scottish Macs ought to hold a convention and agree, if they could, when the capital letter is correct. One day, dealing with the subject, disposed of it this way: "When the part of the name following the 'Mac' is a proper name itself, as in MacDonald, the capital should be used; otherwise the 'lower case' form is correct."—Toronto Globe.

A Cuss county Sunday school teacher named a little girl "where do little girls go?" and the reply was "most everywhere."

For the first time in 12 years England and Wales were declared free from smallpox recently.

How to Stop a Cold Quick as You Caught It

Take 2 Aspirin Tablets.

Drink full glass of water. Repeat treatment in 2 hours.

If throat is sore, crush and dissolve 4 Aspirin Tablets in a half glass of water and gargle according to directions in box.

Almost Instant Relief in This Way

The simple method pictured above is the way doctors throughout the world now treat colds.

It is recognized as the QUICK-EST, safest, surest way to treat a cold. For it will check an ordinary cold almost as fast as you caught it.

Ask your doctor about this. And when you buy, see that you get Aspirin Tablets. Aspirin

Does Not Harm the Heart

ASPIRIN TABLETS ARE MADE IN CANADA

May Be Slight Variation

Figures Regarding Speed Of Light Are Fairly Accurate

The speed of light is placed at 299,774 kilometres or 186,271 miles per second, in a new estimate made at Pasadena, Cal., Dr. Walter S. Adams, director of the Carnegie Institution's Mount Wilson Observatory, said in announcing the new figure that it was not absolute, but that the final computation which will be completed in about six months, would not vary much more than two kilometres from it. The new value is 15 miles per second slower than that reached by the late Dr. Albert A. Michelson in 1927 after he had flashed light beams with mirrors from Mount Wilson to another nearby peak.

THE RHYMING OPTIMIST

By Aline Michaelis

TO SING ANEW

Song must come welling From out the heart, There's no compelling Glad notes to start.

Lyrics must bubble Like rain from streams. No sigh to trouble Their shining dreams.

No carols cover A spirit's moan, Quick ears discover Pain's undertone.

So you, when bringing Gladness again, Set my lips singing Their old refrain.

Yes, you have taught me To sing anew, Dear, since you brought me Joys deep and true!

Monetary Uncertainty

Restoration Of Confidence In Various Currencies Is Needed

Charles Rist, Adviser to French Government says: "At a time when, as everybody agrees, the world crisis is drawing to a close, the thing most needed as a help to the revival of world business is confidence in the various currencies and certainty as to their futures.

"If the monetary uncertainty that prevails at present could be brought to an end, problems that seem insoluble today would solve themselves. Restrictions on imports and the use of quotas, for one thing, would magically vanish. If on the other hand the uncertainty continues much longer, new problems will not fail to arise, and they will be harder to solve than any that we have met so far."

Western Canada Directors

Results of the mail ballot for directors of the Canadian Aberdeen Angus association were announced by F. W. Crawford, Winnipeg, secretary. Western Canada directors are: Manitoba, Harry Lander, Portage la Prairie; James A. Turner, Carroll, Saskatchewan; W. J. Warren, Regina; W. D. Lyon, Devon; Alberta, B. Ward Jones, Calgary; S. Henderson, Lacombe; Roy Ballhorn, Westaskin.

Little Helps For This Week

"The Lord is good, a strong hold in the day of trouble; and He knoweth them that trust in Him."—Nahum 1:7.

Leave God to order all thy ways, And hope in Him what's better betide. Thou'lt find Him in the evil days, Thy all sufficient strength and guide. Who trusts in God's unchanging love, Builds on the rock that cannot move.

Our whole trouble in our lot in this world rises from the disagreement of our mind therewith. Let the mind be brought to the lot and the whole trouble is instantly hushed, let it be kept in that disposition and the man shall stand at ease in his affliction, like a rock unmoved when the waters beat upon it.—T. Boston.

How does our will become unserved by? By conforming itself sacrilegiously to that of God. We will all that He wills, and will nothing that He does not will; we attach our feeble will to that all-powerful will that performs everything. Thus nothing can ever come to pass against our will, for nothing can happen save what God wills, and we find in His good pleasure an inexhaustible source of peace and consolation.—Fenelon.

A Means Of Protection

Less Wheat Production Seems Sensible Under Present Conditions

The fact may arouse repugnance in the heat of economists of the old school, but nevertheless it is true that under the present conditions we are producing too much wheat and must adapt our production to the requirements of the market. This is not a right-about-face for Western agriculture. It is a temporary measure to meet emergent conditions. Gradually, under pressure of economic laws the market for our wheat will be re-established. For the present, there is simply no sense in adding to our own difficulties.—Winnipeg Tribune.

"Fresh from the Gardens"

World War Changed Everything

An article appearing in the daily papers quite recently told of a professor at Harvard University who had compiled a "table of wars," showing that there have been no fewer than 902 major wars since the year 500 B.C., and drawing attention to the fact that the World War, 1914-1918, was eight times "greater" than all the other major wars since 500 B.C. rolled into one. Stated another way this means that the four years of war, 1914-1918, was eight times greater than all the major wars combined in the preceding 2,400 years of the world's history.

If this calculation is even approximately correct it should help us to more fully appreciate the truth and force of the statement so frequently made that the financial and economic difficulties of the nations today had their origin in the World War, and that our troubles are not the result of the breakdown of the existing system because of the unsoundness or inherent weakness of that system, but that the cause is to be found in the destruction of 1914-1918 and in the new conditions and circumstances resulting from that colossal struggle.

To the World War, and the need and emergencies of that terrible contest, can be directly traced the speeding up of invention, the improvement of machines, and the urge to mass production, to which some people attribute much of the existing unemployment,—men replaced by machines. To the World War, also, can be directly traced the bringing of tens of millions of acres into production of various foods and other products then in great demand, and to the uneconomic and more or less artificial production of certain products in countries which prior to the war did not attempt to raise these things but imported them from other countries where their production was a natural process.

The World War, too, is directly responsible for the development of that spirit of narrow nationalism which has infected all nations, a narrow nationalism political in character but which has developed along economic lines in order to promote and strengthen political nationalism. It is not necessarily the system under which the economical life of the world grew so amazingly and prospered so greatly in the last half of the 19th and first decade of the 20th centuries that is at fault; rather, it has broken down because of an outside force, the World War, which prevented that economic system from functioning for the welfare of mankind, and threw it completely out of gear.

That is to say, no matter what system had prevailed in 1914-1918 it could not have withstood the impact and upheaval of the World War and continued to function. Had any of the various new systems now being advocated for adoption to supersede the system which came down from the last century been the prevailing system in 1914 it, too, would have been shattered and the present outcry would be raised against it.

It is the World War that has changed everything, and that change must be met. It cannot be met in a single year, nor by the adoption of any one new system, whether it be political, economic, or social. The needed changes cannot be best and most quickly brought about by destroying existing foundations which inevitably would mean great loss and suffering, and more particularly so to those who even now are the chief victims of the depression. Rather there must be a multiplicity of changes, some small and seemingly insignificant, others large and outstanding, but all interlocked and having a bearing on each other and upon the whole.

The nations of the world now recognize the failure of narrow nationalism, both political and economic. They are all suffering from it, but they have not yet agreed upon a formula for its removal. Recognizing the disease, they are not yet prepared to apply a universal cure. Consequently, we find the nations as separate units devoting their energies to a solution of their own problems and difficulties regardless of the effect which their actions and policies may have upon other nations. On the face of it, this is but a continuance of extreme narrow nationalism, but the almost certain outcome must be a still more acute realization that the nations cannot live unto themselves alone but must come together, and work together for their mutual advantage if they are not all to crash together.

Narrow nationalism, born of war, can only end in war. And the next World War—if it comes—will far exceed in its magnitude and disastrous results to civilization even the great conflict of 1914-1918, tremendous in its repercussions as it has proven to be.

"CONTAINS NO ALUM." This statement on every tin is your guarantee that Magic Baking Powder is free from alum or any harmful ingredient.

Faster Than Royal Scot

Canada's Trains Made Higher Speed On Montreal-Toronto Run

How do Canada's speed trains stack up against the Royal Scot, crack British flyer, which recently visited Vancouver? Railway journals show that the Royal Scot's speed on her 401½ miles between London and Glasgow averages 52½ miles an hour.

Until this year this was exceeded on both Canadian National and Canadian Pacific runs between Montreal and Toronto.

The Canadian National run, 334 miles long, was made in six hours flat, and the Canadian Pacific, 340 miles, in 6½ hours.

This was an average for the Canadian National of 55.7 miles an hour, including stops.

On the 121-mile Montreal-Smith's Falls portion of its run, made with out a stop, the Canadian Pacific trains maintained an average speed of 68.9 miles an hour. This was known among railway men as the fastest time in the world for trips over 100 miles.

This year, however, the highly competitive services between Montreal and Toronto have been abandoned and the two lines run a joint service over the Canadian National tracks. The trip is made in 6½ hours, at 51½ miles an hour.

When She Lost 28 lbs.

She Gained Energy

The young woman's method of reducing overweight is evidently as beneficial as it is effective, and a letter she writes is therefore worthy of publication.

"I am 24 years of age; height 5 ft. 5½ ins.; and a short time ago my weight was 28 lbs. above normal. I was listless and without energy. Now after taking Kruschen Salts regularly I have lost 28 lbs. in weight, and have much more vitality. Also I have a very good complexion and I do not have face blemishes of any kind. Surely this must be due to my having pure blood, and I attribute the fact to my taking Kruschen Salts." (Miss) M. S.

Kruschen combats the cause of fat by assisting the internal organs to throw off each day those waste products and poisons which would otherwise be converted by the body's chemistry into fatty tissue.

A Helpful Suggestion

Customer Did Best She Could To Assist Saleslady

The Christmas shopping season takes the ladies into places more or less strange to them, including various men's departments in the big department stores. A young woman who was in men's underwear in Alameda came upon an elderly lady who was attempting to buy a woolen nightgown for a gentleman. The clerk asked her what size and the old lady faltered. "I can't say exactly," she finally said, and then after a little pause, added with a hopeful smile, "But he goes to bed every night at nine o'clock." The New Yorker.

THAT DEPRESSED FEELING IS LARGELY LIVER

Wake up your Liver Bile

You are "feeling punk" simply because your liver isn't pouring the daily two pounds of liquid bile into your system. Your liver and your bile are both hampered, and your entire system is deranged. What you need is a liver stimulant. Something that goes further than the ordinary laxative, invigorates every fibre of your system, cleanses your blood, and gives you the real essence of health, your liver. Take Carter's Little Liver Pills. Purely vegetable. No harsh cathartic (mercury). Safe. Bile. Wake for them by name. Little yellow tablets. 25c. at all drug stores.

Demand For Wheelbarrows

The wheelbarrow is staging a come back. Jobs created by the civil works campaign, of Lincoln, Nebraska, where hard labor is given preference, increased the demand for wheelbarrows until it far exceeds the supply. Lancaster County Engineer Weaver said he was unable to purchase a single wheelbarrow from supply houses here.

"A new word is wanted," comments a writer, "to signify the horrible noises now made by such things as pneumatic drills and motorbikes." What's wrong with "jazz," for goodness' sake?

Miss Freda Thompson, who has just been granted a flying instructor's license in Australia, is the first woman in that country and third in the British Empire to hold such a license.

China's recent exports are far ahead of those of the same period of 1932.

W. N. U. 2030

Started Canada's First Paper

William Brown, Father Of Canadian Printing, Was Soon Forgotten Canadian printing, lion buried in a Quebec graveyard without even a stone to mark his resting place.

Born in Scotland, the son of "laird of Langlands," William Brown first went to the United States where he worked with Virginia planters and later studied at the William and Mary College in that state. From college he entered the printing house of William Dunlop of Philadelphia, a brother-in-law of the famous Ben-

Sir Herbert Holt, this led to a promotion in 1760 to manage a printing plant in the Barbados, but finding the climate unsuitable he changed his plans and went to Quebec City. Here he inaugurated the first paper in Canada, the Quebec Gazette, printed by Brown and Gilmore at St. Louis Street. It was this proximity to the governmental offices that substantiates the opinion that the powers of the day were taking more than a passing interest in the new venture.

The paper prospered and the firm branched out to include a well equipped bookellers' and stationers' establishment. The partnership with Gilmore, who had been a fellow apprentice in Philadelphia, continued until his death in 1722.

Brown's qualities as a citizen and a craftsman were his highest praise. At the siege of Quebec he was to the fore in all the fighting, shouldering his musket on the walls of the city. He died on March 27, 1789, a bachelor.

After an honored career of 111 years the old Gazette was merged into the Quebec Morning Chronicle and its founder has gone forgotten. I lately a resident of Quebec came across an item in an old edition of the paper which gave the full story of the "Caxton of Canada." A movement is now under way to raise funds to institute an archaeological and bibliographical exhibition by the Quebec Literary and Historical Society of Laval University, thus bringing belated recognition to this great pioneer.

A Remarkable Invention

Ray Demonstrated In London, England, Does Many Wonderful Things

One of the most remarkable inventions of the age has been secretly demonstrated in London, Eng. It is a ray that will make flower-buds grow into flowers in a few minutes; take night photographs of objects several hundred yards distant; penetrate the densest fog, and cure a number of complaints.

The ray upon which its inventor, Mr. A. E. W. Batchelor, has been working for the past ten years, is causing tremendous interest in many British industries, particularly those connected with horticulture. A demonstration at the nurseries of a leading firm of seedsmen recently produced astonishing results. A pot of crocus bulbs which had not even begun to show signs of flower buds, and which normally would have taken several weeks to bloom, were placed in the radius of the ray. Within ten minutes their petals had appeared and spread themselves.

"It is possible, materially, to increase the yields of all crops," Mr. Batchelor said. "Clover, clover, cereals, roots and sugar beet can all be improved both as regards yields and food value. The maturing properties of the ray are shortly to be extended to fruit and vegetables so that strawberries and fresh garden peas and beans out of season are all within the realms of possibility."

One of the remarkable features of the ray is the ease with which it is claimed it penetrates darkness and the densest fog, clearly revealing objects at several hundred yards distance.

Managed As Business

James A. Farley, American Postmaster General, is in London trying to find out how John Bull can run his system with a profit of \$53,000 in 1931-32 and \$54,000,000 in 1932-33, whereas Uncle Sam in the same two periods had deficits of \$15,000,000 and \$150,000,000. The answer is that British utilities are run on a business basis.

He: "If we were married, darling, the hours would roll by without our noticing them."

She: "Do you mean we probably wouldn't be able to afford a clock?"

"You pushed your wife out of a second story window through fog-fogliness," asked the magistrate.

"Yes, sir; we used to live on the ground floor. I forgot we moved."

Review Favourable Year For Royal Bank of Canada

STRONG POSITION MAINTAINED

Sir Herbert Holt, President, Takes Strong View That Canada Is Now Definitely on the Upgrade.

Morris W. Wilson, Vice-President and General Manager, Reviews Strong Statement.

The annual meeting of the shareholders of the Royal Bank of Canada marked the close of a most successful year.

Sir Herbert Holt, President, in his address struck an optimistic note when he stated that he considered that Canada was now definitely on the upgrade. Its progress, however, was being retarded by too heavy taxation and the cost of maintaining so many Governments in the country was rapidly becoming unbearable.

Morris W. Wilson, Vice-President and General Manager, in his address reviewed the outstanding features of the strong statement of the Bank. The feature of greatest importance in connection with the possible formation of a Central Bank, added Mr. Wilson, would be the quality of its management.

President's Address
Sir Herbert S. Holt, President, in moving the adoption of the Directors' Report, said in part:

"The 64th Annual Report and Balance Sheet submitted to you to-day disclose the strong position of the bank. While Balance Sheet figures are somewhat smaller than those of a year ago, this is due to a falling off in international deposits rather than contraction of Canadian business. In fact, a notable feature is an increase in Canadian Demand and Savings deposits during the year. The liquid position is eminently satisfactory. As you are well aware, the restricted demand for commercial loans, and the resultant increase in our holdings of less remunerative assets in the form of Dominion and Provincial Government securities, has combined with other factors to reduce profits. In April last, the dividend was reduced from 10 per cent. to 8 per cent., and the last three quarterly dividends have been paid at that rate. The improvement which has taken place in business during the last six months, has already had a beneficial effect on earnings."

Referring to the situation in Canada, the President said: "I am glad to say that since we last met there has been a distinct improvement in Canadian business. I have had the opportunity of seeing this country recover from depressions on various occasions during the last fifty years, and the present movement appears to be taking place along the accustomed lines. As soon as world trade commences to revive there is an improved demand for Canadian raw materials. Canadian exports increase proportionately, and our inventories disappear and greater activity in the principal exporting industries provides additional employment with a consequent increase in purchasing power and domestic trade. This has been the sequence of events in Canada during the last six months."

The Railway Situation

Dealing with the situation of the Government railways, Sir Herbert expressed the opinion that the time for half measures had passed and that bold and creative action was required. He felt that the views expressed at the last Annual Meeting that enforced co-operation between the two railway systems would not be a satisfactory remedy had been confirmed by the experience of the past year and is still of the opinion that the maximum of economy can only be obtained by some form of administrative amalgamation.

The President made a strong demand for a reduction of Governmental debts and pointed out that the cost of maintaining too numerous governments, Federal, Provincial and Municipal, was becoming unbearable. He said: "Greater activity in business will reduce unemployment, produce increased revenues, and a reduction in disbursements for public relief. Advantage should be taken of these developments to reduce debt rather than increase expenditures."

Conditions In Other Countries

In referring to conditions in other countries he expressed the view that the low point in the depression for most of the world was reached in the latter part of 1932, and since that time there has been a general increase in international trade. Reference to the United States was made as follows:—"While business in the United States is improving, about the middle of 1932 it later suffered a relapse due to their banking difficulties and the hesitation and uncertainty which prevented a change of administration. Since last March quite material progress has been made."

A new bleaching process for woolen is said to produce a white goods that does not turn yellow from laundering or dry cleaning.

made. It is difficult to analyze the effects of their policies and impossible to prophesy the outcome. Their central idea that an increase in the price level must be obtained is sound common sense and is now quite generally accepted as such throughout the world. At our Annual Meetings of the last three years we have emphasized and re-emphasized the necessity for a higher price level. I see no reason why it cannot be achieved in due course."

In closing Sir Herbert Holt said: "At our last Annual Meeting I expressed the feeling that indications pointed to the initiation of a substantial recovery in 1933. This year it is possible to go one step farther and to venture the opinion that we are now definitely on the up-grade. If we deal intelligently with the main problems that confront us we can expect within measurable time a return of general prosperity."

General Manager's Address

Mr. M. W. Wilson, Vice-President and General Manager, in referring to the position of the bank pointed out that liquid assets totalled \$362,471,000 and were equal to 55.7 per cent of public liabilities, compared with 52.86 per cent of the previous year. A notable feature is that 4.26 per cent of such liabilities is represented by cash and cash balances aggregating \$157,699,000. He mentioned the further interesting fact that in Canada currency deposits increased about \$17,000,000 during the year and savings deposits were higher by \$2,000,000.

In discussing the proposed central bank he recalled the hope which he expressed at the last Annual Meeting that the Government would see fit to have the project examined by a body of experts and said: "The Royal Commission on Banking and Currency which was constituted last summer could not have been better chosen. Under the Chairmanship of Lord Macmillan their sittings in all parts of the country were notable for the freedom with which all possible evidence was received and for the patience and care displayed in dealing with the material submitted. While I do not agree with the Report in its entirety I believe that a properly constituted Central Bank would be developed as a useful adjunct to our banking system."

Note Issued

Mr. Wilson expressed the strong opinion that the recommendations in the Report with respect to the gradual withdrawal of the note-issuing privilege from the Chartered Banks did not appear to be in the public interest. Retention of these privileges would not hamper the Central Bank in its present operations. In this connection he quoted an editorial which appeared in the London Economist and said: "The Central Bank would not be in the least weakened by allowing the Chartered Banks to retain their present issues under the present restrictions. Mr. Wilson went on to say: 'I think, therefore, that we should view the elimination of bank note issues not as a step which might inevitably hamper the creation of a central bank but as a separate matter entirely. The real question is whether the Government desires to have banking services maintained at many small points throughout the country or to appropriate the revenue of note issues for themselves. I believe that the gain to the Government would not offset the loss to the public through curtailment of this facility. It is unquestionably there are many places which could no longer support a branch of a bank. The operation of a number of small branches at a bare margin of profit is characteristic of this country. We have a system which in many of its aspects is native to the Dominion and prudence should prompt us to be very cautious in advocating fundamental changes.'"

In conclusion Mr. Wilson said: "At our last Annual Meeting I ventured to suggest that the prospect of further improvement in the coming year was very much more hopeful than it was the previous year. That prediction has been borne out by subsequent developments. For the first time in years an attitude of quiet but confident optimism is in evidence all over the country. Many problems still have to be solved but I have full confidence in the ability of Canada to share in the continued improvement in economic conditions which I believe lies ahead of us."

All chess was made on farms in Canada until the year 1864 when the first chess factory was started in Oxford county, Ont.

Health For Young Girls Happiness For Tired Women

Thousands of women become tired out and run down, become thin and pale, and profound weakness makes life a burden. The whole outlook of life is changed when the nervous, sick headaches, the sleeplessness, the spells of dizziness, of weakness and discouragement, and the tired, languid feelings disappear with the use of Milburn's H. & N. Pills. They tone up the nerves, enrich the blood, and bring the health back to normal again.
